

PRESS RELEASE

For immediate release: 29th April 2016

Register now! Go to www.esccapevents.org for details

The European Scientific Counsel for Companion Animal Parasites (ESCCAP) is to host a major European science conference in Granada, Spain from 19–20th October 2016 at the SEVC conference, Palacio de Congresos de Granada.

This ESCCAP meeting will concentrate on the problems presented by emerging zoonotic vector-borne diseases in Europe. Highly-recognised experts and representatives of active research groups will provide updates from the field and this focused scientific meeting will bring together researchers of different areas to discuss common solutions in the frame of a one-health concept.

In addition to guest speaker presentations, the scientific committee will accept abstracts for further oral proceedings and also poster submissions. More information about the event can be found on ESCCAP's dedicated events website at www.esccapevents.org.

Notes for Editors

1. The European Scientific Counsel for Companion Animal Parasites (ESCCAP) was formed in 2005. It is an independent, not for profit organisation, comprising a group of eminent veterinarians across Europe all with recognised expertise in the field of parasitology. Further details about ESCCAP can be found at www.esccap.org.
The main aim of the organisation is to have a Europe where parasites are no longer an issue for pets or humans. ESCCAP is dedicated to providing access to clear and constructive information for veterinarians and pet owners with the aim of strengthening the animal human bond and working to provide the knowledge essential to help eradicate parasites in pets.
2. Promotional images for the conference and the **Vector-borne Diseases 2016** logo can be provided.
3. The ESCCAP **Vector-borne Disease 2016** meeting is sponsored by Bayer Animal Health, Merial Animal Health and Zoetis Animal Health.
